Akole, Maharashtra - 422603, India

SUMMARY

- Frontend Developer with 2 years of experience building scalable React applications using TypeScript, Redux Toolkit, and modern frontend architectures. Experienced in developing workflow-driven enterprise applications, role-based access control systems, dynamic UI rendering, API integrations, and AI-powered user experiences with a focus on performance and usability.

SKILLS

- Frontend** : ReactJS, TypeScript, JavaScript, Redux Toolkit, HTML, CSS, Tailwind CSS, Material UI
- Backend** : Node.js, Express.js
- Database Systems** : MongoDB
- Tools & Technologies** : Git, Github, REST APIs, Postman, Cloudinary, Cloudflare, Docker, Docker Compose

EXPERIENCE

• Network Techlab India Pvt Ltd

Apr 2025 - Present

Software Engineer

Mumbai, India

- Built a scalable **asset management web application** using React, TypeScript, and Tailwind CSS, implementing QR-based asset tracking that improved asset visibility and traceability across departments.
- Implemented **role-based routing and access control**, restricting routes and UI elements by user permissions to strengthen application security and prevent unauthorized access.
- Designed a **workflow-driven dynamic UI**, with backend-configurable fields and attributes, enabling flexible data rendering and table structures across multiple modules without code changes.
- Developed **reusable, modular components (Table, Modal, Filters, Pagination)**, reducing duplicate code and accelerating new feature development across the application.
- Built **bulk asset import through Excel** with validation and error handling, cutting manual data entry effort by an estimated 60-70%, and developed a **dynamic PDF generation module** exporting reports with customizable layouts and multiple page orientations (A4 Portrait/Landscape).
- Integrated REST APIs with efficient state management (pagination, filtering, search) to handle large datasets, and improved perceived performance using **Shimmer UI loaders, lazy loading, and responsive design**.
- Containerized the application using **Docker**, enabling consistent development, testing, and deployment environments across different platforms.

• MITR Learning & Media Pvt Ltd

Jun 2024 - Apr 2025

Frontend Developer

Remote

- Worked as a frontend developer on a **UK-based e-learning project** that provides online digital material to students.
- Developed** responsive web applications, improving **user engagement by 35%** through optimized UI/UX design in **React, HTML, CSS, and JavaScript**.
- Implemented** reusable React components, reducing **development time by 40%** and enhancing **code maintainability**.
- Optimized website performance**, achieving a **50% faster load time** by leveraging React lazy loading and code splitting.

FEATURED PROJECTS

• AI-Powered Multilingual Video Learning Platform

Mar 2026 - Present

Tech Stack: [HTML, Tailwind CSS, JavaScript, ReactJS, Redux Toolkit, Youtube Data API]

[]

- Integrated **Google Gemini AI** to transform long-form YouTube videos into concise multilingual summaries, reducing content consumption time for users.
- Generated structured outputs including **summaries, key points, detailed guides, and important takeaways in English, Hindi, and Marathi**.
- Enabled **PDF export of AI-generated content** for offline reading and sharing.
- Integrated **YouTube Data APIs** for video search, recommendations, comments, and content discovery workflows.
- Built a **responsive video streaming platform** using React and YouTube Data APIs with search, recommendations, comments, and dynamic video playback.
- Implemented **infinite scrolling, lazy loading, shimmer loaders, caching, and code-splitting** to improve performance and user experience.

EDUCATION

• Savitribai Phule Pune University

Aug 2020 - Jun 2024

BE Computer Engineering - GPA: 8.62/10.00

Pune, India
